Passionate and dedicated developer with a strong focus on back-end development, specializing in Node.js and Express. Proficient in front-end technologies like Next.js, providing a holistic approach to development. Known for unwavering curiosity and a relentless pursuit of knowledge, I excel in optimizing performance, working with complex databases, and designing scalable solutions. Committed to delivering high-quality results, especially in back-end development, where complex problem-solving is a key asset.

WORK EXPERIENCE

AMA European Consulting
Back-end developer
(April 01, 2023 - July 31, 2023)

Responsible for the back-end development of a management app for one of the company's clients, primarily using **Node.JS / JavaScript / Express / MySQL** . My role included :

- analysis of the business logic of the various services in conjunction with the front-end team and the customer
- database creation: schema, tables, relations, logic (SQL database)
- creation of the business logic for the application and its various services. Routes , services, controllers ... - authentication system (JWT), mail exchange system (NodeMailer), automated PDF contract creation (PDFKit) -API documentation with Swagger

BeCode
web developer training
(August 30, 2022 - March 30, 2023)

long, intensive training to learn the developer's trade. Active methodology for independent learning. Enabled me to learn new technologies and languages in an effective and operational way. FullStack approach to web development. Gives me an overview of the profession and its practical application.

- Web page basics with **HTML / CSS / JavaScript**
- dynamic web interface creation and fetching API with **React.js**
- Server side development with **Node.Js / Express**
- SQL / NoSQL database creation and management (**PostegreSQL, MySQL, MongoDB**)
- team projects with SCRUM methodology
- Versioning with **GIT / GitHub**. And using GitHub as a team, best practice, branch management etc.
